Crespi proudly presents its latest masterpiece, a tribute to the spirit and legacy of racing cars.

These limited-edition cars embody power, safety, and cutting-edge technology, crafted by Argentina's top minds in single-seater engineering.

Behind this visionary creation stands the Crespi team: Matías, Sandro, and Luciano Crespi, alongside the ingenious Tulio.

Crespi's Formula Concept cars bring the essence of the 80s and 90s racing legacy to life - a stunning homage to the era's iconic designs.

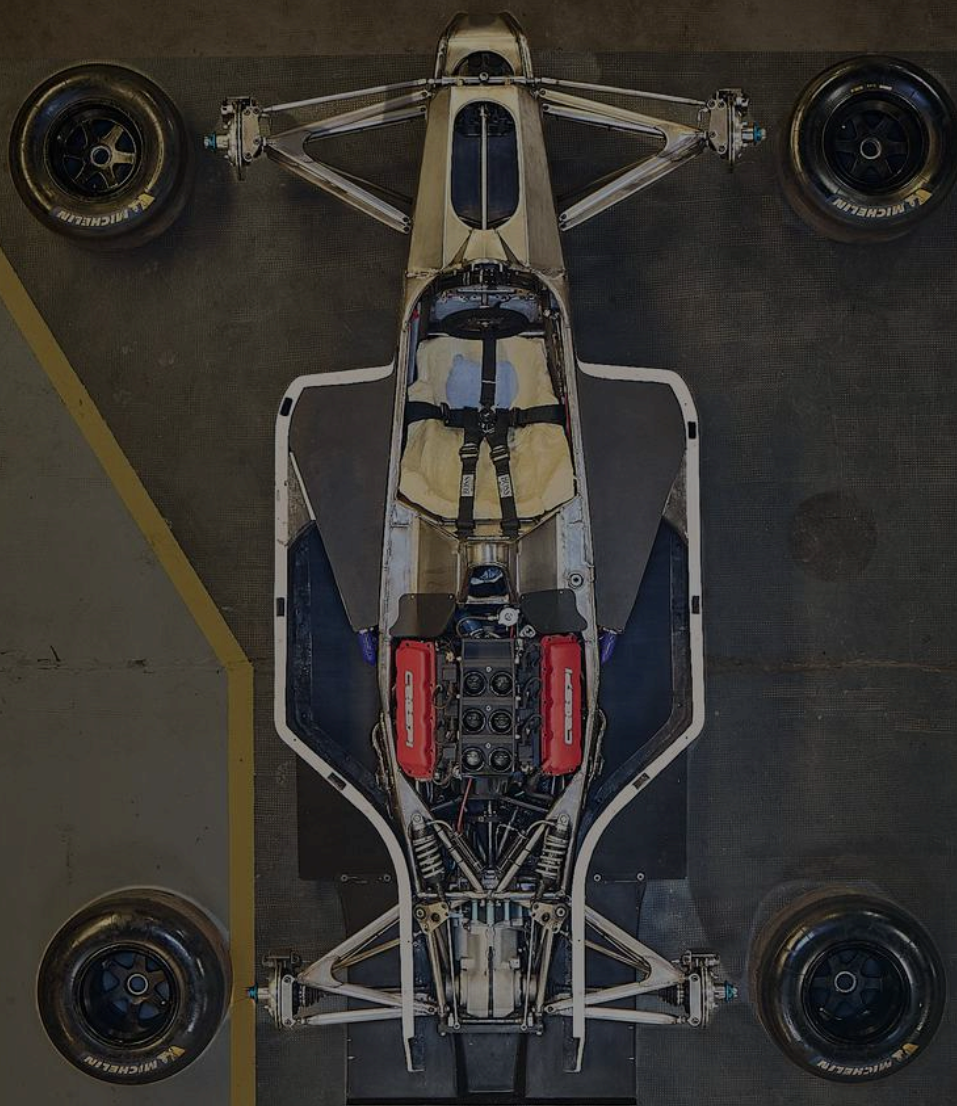

A visionary team of Crespi has developed a technological marvel that's far more than a car; it's a custom-crafted masterpiece built to ignite adrenaline on high-performance circuits.

With creativity, precision, and professionalism at the heart of every detail, each model is meticulously handcrafted, limited edition and ready to race.

The monocoques are designed with safety standards and approvals for competition.

The cockpit maintains the original measurements of the models represented, as well as the aerodynamic assembly that covers the structure.

We optimize the rider's comfort, maintaining the original driving position.

"We have all shared the dream of driving these automotive icons, of treasuring them in our collections.

Now, it is our honor to invite you to enjoy the exhilaration and fun as we unleash these wonders and make them available to the world."

EXPERTLY HANDMADE

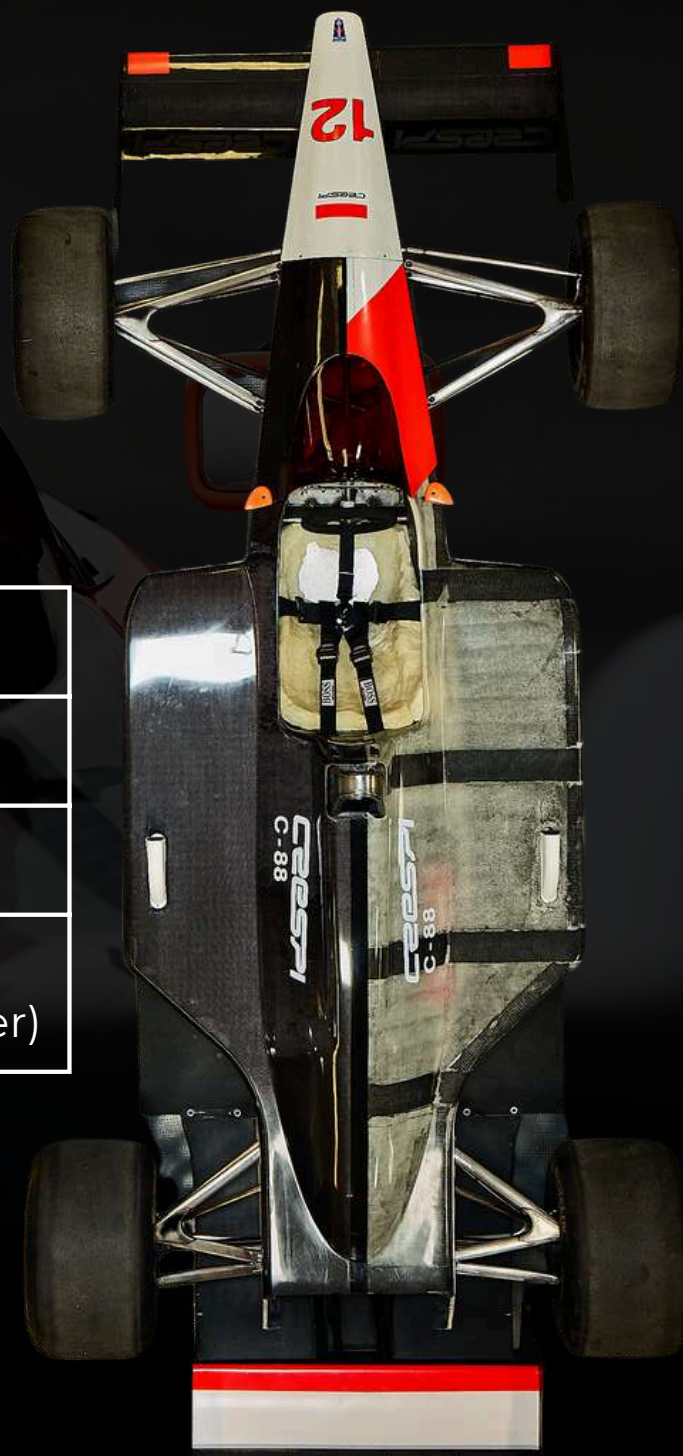

TECHNOLOGY INSPIRED

The Crespi Formula Concept cars embody cutting-edge technological advancements, seamlessly integrating state-of-the-art aerodynamics, lightweight materials, and high-performance engineering.

Each component is carefully selected to optimize speed, safety, and handling, from advanced suspension systems to precision-tuned engines.

TYRES

At Crespi, we incorporate distinctive Pirelli tyres in our Limited edition models, which enhance both the design and the performance to deliver a driving experience.

Pirelli's Color Edition tires offer a unique combination of performance, featuring variable rubber compounds such as those used in current racing competitions, including hard, medium, and soft options.

They are identified on the side walls in vibrant tones such as red, yellow, white, and silver
